NEW SERVICE OFFERING INTERNAL AUDITING SERVICES

In these current economic times it is very important to ensure that all of your processes and procedures are sufficiently robust and strong enough to meet the demands, which currently exist. Are your assets, both human and other resources adequately protected? The assurance that your staff is working at optimal efficiency and that there is no wastage of time or resources is as important as ensuring that your cash is properly accounted for and deposited in the bank.

Flamingo Consultants has formed an alliance with a small group of accountants and we can come into your organization and assess your needs and perform the internal auditing function for you on an ongoing basis for a reasonable fee. Our fee will be such that it would be less costly than if you hired persons to perform the internal auditing function or if you have internal auditing staff we can work along with them to strengthen the function.

Contact us today by e-mail or phone and let us assess your particular situation and provide you with a quote. This will be invaluable to ensuring that your company is protected and runs as efficiently and as profitably as possible.

**OUR CONTACT INFORMATION IS ABOVE
WE ARE CONFIDENTIAL AND DISCREET**
